WELCOME WORD

On behalf of the Czech Society for Cell Biology, I wish to extend a cordial invitation to you to participate in the 12th International Congress of Cell Biology. The congress, held under the auspices of the International Federation for Cell Biology (IFCB), will take place 21-25 of July, 2016 at the Prague Congress Center, Prague, Czech Republic.

The aim of the congress is to offer a unique opportunity for sharing well selected aspects on the latest evidence based research findings and applications in cell biology and related disciplines. Also, the congress is a stimulating forum for professional development and establishing fruitful global and regional collaborations.

Newly integrated in the congress programme are the academic, scientific and corporate project development day, exchange and career fair for students, professional development accreditation, industry training centre and last but not least new innovative congress technologies for delegates. We expect more than 3000 participants including 80 invited speakers.

The congress theme, „Exploring cellular structure and function“ recognises the key role that cell biology plays in the management of deeper understanding of the tissues and organisms that cells compose. We have done the utmost to create a programme in line with the theme.

Prague is a charming city situated in the very heart of Europe. It has a rich history, magnificent architecture, and a unique culture. The region of Prague is an important center of research with several universities and a majority of institutes of the Czech Academy of Sciences. Please join us for the International Congress of Cell Biology 2016 in Prague, Czech Republic. We look forward to seeing you in July 2016.

Prof. Ivan Raška

Chairman of the Czech Society for Cell Biology, z.s.

Chairman of the 12th International Congress of Cell Biology
